Research Methods & Workshops

AI & Computational Methods (Python)

- Developed AI-enabled research and experimentation applications:
  The Artificial Organization Design Studio: A tool for designing and simulating AI teams and micro-organizations.
  The Collaboratory: An online platform for observing and analyzing group discussions in real time.
- Engineered and fine-tuned LLMs (OpenAI GPT, LLaMA, Gemini) for advanced textual analysis, including semantic embedding, topic modeling, and augmenting qualitative coding.
- Expertise in prompt engineering and API integration for scalable analysis of multilingual data (English & Chinese).
- Key Application: Developed custom LLMs for semantic analysis in two working papers:
  "Strategic Decoupling in International Disputes" (SMS Best Paper shortlist)
  "From Plateau to Pivot" (Revise & Resubmit at Organization Science)

Econometric & Quantitative Modeling (Stata)

- Applied advanced econometric methods including Propensity Score Matching (PSM), Difference-in-Differences (DiD), and Principal Component Analysis (PCA).
- Constructed and analyzed Trade Gravity Models to develop trade integration indicators.
